A Personal Message

IN presenting our catalog, we wish to emphasize the fact that it is hardly possible for us to express in words our appreciation to our many customers, for the business we have enjoyed during the past years in which we have been engaged in the nursery business.

We have tried to construct our catalog in a plain straightforward way, so that all can understand it. We have tried to list the varieties that will prove best in this section of the country, giving a brief description of each. In some cases we have added to our list, especially in our ornamentals.

Your attention is called to the reduced prices in this catalog which you will find are in reach of all. We have a good supply of healthy, vigorous and well-rooted trees and plants. And we are soliciting your valued orders, confident that you will be pleased with our stock, and join our many satisfied customers.

We thank you in advance for any business that you may place with us, and assure you it will at all times receive our best possible attention.

GEO. E. STEIN & SON.

WE INVITE YOU TO VISIT OUR NURSERIES

Our Nursery and office are located one-half mile west of East Prospect on the road leading from East Prospect to Wrightsville.

Our Branch Nursery is located along the Lincoln Highway three miles east of York.

To reach our Nursery from York take Route 124 to East Prospect.

From Red Lion Route 224 to Craley, and 124 to East Prospect.

From Wrightsville Route 224 to first macadam to right.

No business transacted on Sundays.

INSTRUCTIONS TO PURCHASERS

Orders. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are often sold out of some of the varieties. If ordered early we can reserve the stock until you want it shipped.

Shipping. We have the Pennsylvania Railroad and can ship in any direction with the probability of prompt arrival at destination. All shipments travel at the cost and risk of the purchaser.

Truck Deliveries. Truck load orders will be delivered free, reasonable distances; long hauls and smaller orders delivered by special arrangement. We are well equipped to make prompt delivery.

Guarantee. We guarantee all stock to be strictly first class and true to name and will upon proper proof refund the purchase price, or replace any stock which proves otherwise. It is understood and agreed that we will not be held responsible for any greater sum than the cost of the stock, should any prove untrue. We strive to avoid mistakes and believe that we are as exact as any in the business.

Our nurseries are inspected every year and every shipment will be accompanied by a Certificate of the State Inspector.

Replacements. We guarantee all stock we sell to be strictly first-class and TRUE TO NAME, dug and packed properly for shipment; we do not charge a price for a tree that, should it die, we could replace it and then still make a profit. Stock often perishes when it is not properly planted and cultivated; also the severe cold and heavy storms of Winter and droughts of Spring and Summer, which are liable to occur, will sometimes cause the best of stock to perish, which is no fault of ours.

It is impossible for us to guarantee trees and plants to live, as this altogether depends on weather conditions and how stock is planted and cared for after planting. The conditions which prevail after stock leaves our hands are such that it is just as impractical for a Nurseryman to guarantee a tree or plant to live as it would be for your best neighbor to sell you a horse or other live stock and guarantee it to live. We can only guarantee to send you good stock up to grade represented, full of life and true to name.

Terms Cash, except when expressly agreed otherwise.

Substitution. When sold out of a variety of trees or plants we frankly say so, and when you allow us to substitute we will send a variety similar to the one ordered, as good or better; as we know the many varieties, our substitution, if any, will be of advantage. Late in the season we are sometimes sold out of some varieties of stock; thus when sending your order it is to your advantage to say whether we may substitute or not, that we may get the order off promptly, before the season is too far advanced for successful planting. If you do not wish us to exercise this right, please mark your order sheet plainly NO SUBSTITUTION.

SUMMER VARIETIES

YELLOW TRANSPARENT. Earliest and best; white, tender, juicy, sprightly sub-acid; grows upright; bears when young, making good filler.

EARLY HARVEST. Medium; pale yellow; tender, juicy.

SUMMER RAMBO. Very large; greenish red, striped; tender, juicy; tree strong grower.

RED ASTRACHAN. Large, nearly covered with deep crimson, juicy, rich, acid, beautiful. Tree a vigorous grower. A good bearer.

EARLY STRAWBERRY. Tender, juicy, productive.

WATERMELON. Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer.

FALL VARIETIES

GRAVENSTEIN. Large striped, fine quality, one of the best fall sorts.

MAIDEN BLUSH. One of the most beautiful; pale lemon with crimson cheek; flesh white, tender and crisp.

WEALTHY. Fall. Almost solid red. Flesh white, tender, crisp, juicy, fine grained. A good keeper.

McINTOSH. Medium size, nearly covered with a bright red, flesh yellowish, tender, juicy, sub-acid.

SMOKEHOUSE. Fruit medium to large, uniform size and shape. Color yellow or greenish mottled with rather dark red, sometimes deepening to a bright red.

WINTER VARIETIES

GRIMES GOLDEN. Very large, skin golden yellow; flesh tender and crisp. A very good fall apple. September to January. Grown in all sections of the country.

STAYMAN WINESAP. A profitable sort to grow for market, and the best for home use. Large in size, fine appearance, good flavor, juicy and crisp, color red. A great success.

ROME BEAUTY. Large; roundish, slightly conical, with bright red on a pale yellow ground. A profitable variety.

DELICIOUS. Keeps well, color red, fine grained; and quite juicy, quality very good. A good apple for either home use or market.

YORK IMPERIAL. A medium to large winter apple with yellow skin shaded red; firm, juicy, sub-acid. An excellent canning and shipping apple.

JONATHAN. Most beautiful of all apples. Fruit medium to large, roundish, yellow nearly covered with red, fine grained, tender and finely flavored.

PARAGON. Winter. A round apple, of extra-large size; skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid aromatic, of excellent quality in every way. Tree is vigorous and healthy.

WINTER BANANA. Size large, golden yellow and beautifully shaped with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich, aromatic flavor. Season November to January.

PARADISE WINTER SWEET. Large; creamy white, rosy cheeked. One of the best sweet winter varieties.

RHODE ISLAND GREENING. Large, greenish yellow, tender, juicy, rich, acid. The old reliable Winter cooking apple, and also good for dessert.

FALLAWATER (sometimes called Pound Apple). Large; yellowish green.

HUBBARDSTON. Large, red, striped, tender, juicy.

STARK. Large, striped, mild, sub-acid, good. Valuable as a keeper. January to May.

BALDWIN. Large, bright red, crisp, juicy, rich.

RAMBO. Medium, red and yellow. Mild flavor. Excellent old variety. October to December.

CORTLAND. A derivation from McIntosh, adding distinct perfections to that already very perfect apple. The tree: hardy, thrifty, early producing and long lived. The fruits: abundant, large, round.

CRAB APPLES

HYSLOP. Large; deep crimson; one of the most beautiful; very popular.

TRANSCENDENT. For many years the most popular crab apple. Fruit about an inch in diameter, yellow, with red cheek.

PEACHES

We are offering only a limited number of varieties, ones that you can depend on giving you a good crop of fruit. We do not think it worth while to propagate a large number of varieties, when a few of the best will make more money for our customers. The peach crop is quite sure if you give your trees proper attention.

PRICE OF PEACHES

	Each	Per 10	Per 100	Per 1000
2 to 3 ft.....	\$.15	\$1.00	\$8.00	\$60.00
3 to 4 ft.....	.20	1.50	10.00	80.00
4 to 5 ft.....	.25	2.00	15.00	120.00
5 to 6 ft.....	.40	3.00	20.00	

Varieties listed according to season of ripening as near as possible.

SNEED. Bright red cheeks. Earliest market Peach.

GOLDEN JUBILEE. Yellow, freestone, ripening four or five days ahead of Carman. Very attractive peach of good size and fair quality. It withstands shipment better than most early varieties. This peach has attracted much attention in New Jersey where it was originated by the New Jersey Experiment station. Where an early yellow freestone peach is desired we would recommend planting this variety.

CUMBERLAND. A seedling crossed with Greensboro. The tree is a vigorous grower and as hardy as the Carman. The fruit is larger than Belle of Ga. attractively colored with red, oval in shape. The flesh is white, almost free.

CARMAN. Large, creamy white skin, mostly covered red; tender, juicy. Good commercial shipper.

HILEY (early Belle). The earliest commercial white freestone Peach. It resembles Belle of Georgia, but in quality is superior to most of its white-fleshed competitors. The pretty red cheek and good shipping qualities make it very popular for early market.

ROCHESTER. Has the habits and characteristics of the Crawford. Yellow, freestone, very sweet and fine flavor. Requires only half the usual amount of sugar for canning. Ripens about the middle of July.

SOUTH HAVEN. Yellow, freestone, large, roundish, uniform size, deep yellow with a red cheek, delicious flavor. Ripens about fifteen to eighteen days ahead of Elberta. Tree very hardy, good grower and a consistent, heavy bearer. A most promising early yellow freestone peach for the commercial orchards.

Evergreens in Foreground, Fruit Trees in Background

CHAMPION. A large, handsome, early variety. Creamy white with red cheek; sweet, rich and juicy; hardy and productive.

BELLE OF GEORGIA. Very large Peach with red cheek; flesh white and firm, of excellent flavor; fine shipper.

OLD MIXON. A showy, white fleshed peach with a bright red cheek. Very large, juicy, sweet and good.

EARLY ELBERTA. This is one of the finest of all the Elberta family. Ripens from one week to ten days earlier than the Elberta.

ELBERTA. Mid-season. A valuable large peach, of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety.

J. H. HALE. One of the best sorts for market or garden. Fruit is very large, round, quality excellent. Skin yellow finely colored, flesh yellow. Ripens just before the Elberta. A very good one.

CRAWFORD'S LATE. Large, yellow Peach, fine for canning and market.

GOLD DROP. Medium size, hardy, very productive, good quality, early bearer.

STEPHEN'S R. R. White, partly covered with red. A fine-flavored Peach of good size and a splendid market variety.

SMOCK. One of the best of the late varieties, ripening about three weeks after Elberta. It is of large size, with yellow flesh. Very desirable market Peach.

SALWAY. A late yellow variety. Latter part of September to October 15.

IRON MOUNTAIN. Freestone. Fruit is of large size; color, white.

BILYEU. Large; nearly covered with dark red; flesh white and firm. Middle to last of October.

ABUNDANCE. One of the oldest and best varieties; hardy, productive. Fruit large, heavy bloom; good quality. August.

BURBANK. Most profitable among growers for market; ripens ten days after Abundance. Tree hardy.

OCTOBER PURPLE. A strong, vigorous grower, hardy, productive, of good quality; a large, round, late purple plum, especially recommended for late market.

RED JUNE. One of the vigorous, upright growers; productive; fair size, vermilion red; pleasant quality. Ripens a week before Abundance.

CLIMAX. One of the best of the large, early sweet plums, ripening ahead of other varieties, which makes it a very valuable market sort. July.

GOLD. Large, oval, bright yellow; rich, juicy, fine quality. A good grower.

BRADSHAW. A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of August.

GERMAN PRUNE. Large, dark purple, sweet, good. One of the most popular for canning, because of its sweetness. September.

ITALIAN PRUNE. Good size, purple, juicy, delicious, fine for drying. September.

BARTLETT. Season last of August to September 15th. Good strong grower, flesh is white, fine grained, luscious, large and buttery, has a rich melting flavor and very sweet.

CLAPP'S FAVORITE. Summer. Fruit large, yellow lemon color, spotted with brown dots; flesh fine, rich and sweet. A very good one.

DUCHESS. Strong grower, productive, not subject to blight. Fruit large, light green patched with russet, melting, juicy, sweet and good.

KIEFFER. One of the most prolific pears. It is an abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Begins fruiting successfully when three years old. Season October.

SHELDON. A large, round, russet and red pear of very fine quality; melting, rich, and delicious. Tree vigorous, erect, and handsome; bears well and should be more largely planted.

LAWRENCE. Medium, yellow with brown dots, melting, pleasant, aromatic.

SECKEL. Medium size, skin rich, yellowish brown with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored pears known.

SWEET CHERRIES

As our soil is ideal for the purpose, we specialize on growing Cherry trees. Our Sweet Cherry are all budded on native Mazzard seedlings. This gives a tree of known hardiness and vigor, both in root and trunk, and is much more sure to grow when transplanted. Therefore, planters should insist on having all sweet cherry budded on Mazzard stock, and avoid disappointment. Ask for leaflet on growing sweet cherries.

The above picture shows a group of Nurserymen from various parts of Penna. in one of our cherry tree blocks, studying methods of identifying varieties by their foliage. The work was in charge of Dr. W. H. Upshall, Ontario, Canada, and Prof. F. N. Fagan, State College, Penna.

BING. This valuable black cherry succeeds everywhere. Flesh very solid, flavor of the highest quality, a fine shipping and market variety.

BLACK TARTARIAN. Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country.

GOVERNOR WOOD. Large, heart-shaped; light yellow, mottled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety still a favorite in many regions.

LAMBERT. One of the largest of all Cherries. It is purple red; firm and rich. Every year sees an enormous crop.

NAPOLEON BIGGAREAU (Royal Ann). A beautiful cherry of large size; pale yellow with bright red cheeks; flesh firm, juicy and sweet; one of best for market and canning. Hardest of light yellow cherries and deservedly popular.

SCHMIDT'S BIGGAREAU. The fruit is of very large size, of deep mahogany color. Flesh dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. Is an excellent shipper.

YELLOW SPANISH. A pale yellow cherry with bright red cheek in the sun. It is one of the best, most beautiful and popular of all the light-colored cherries; vigorous and productive.

WINDSOR. Fruit large, liver-colored, distinct, flesh remarkably firm and of fine quality. Tree hardy and prolific. A valuable late variety.

OX HEART. Large, heart shaped, solid. Yellow with red cheek. Tree healthy and productive.

HEDGE PLANTS

CALIFORNIA PRIVET. The most popular hedge plant on account of its beauty, adaptability, and low cost. Did you ever realize what an admirable and luxuriant privet hedge you could secure at a very small cost, and how much it would add to the value of your property? To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two.

They should be planted 3 inches deeper than they stood in the nursery row. Set the plants 6 inches apart in the row. Dip the roots in water before planting. After plants are set, cut them down to 4 inches from the surface of the ground. This will cause a thick new growth to start and is very essential for a beautiful hedge.

ROSES

The list we offer is not a large one but contains the "cream" of the ones which thrive best here. Our roses are two-year field-grown, were dug in the Fall and are planted in six-inch pots. In this way they will be sure to grow, and bloom in a very short time.

Radiance Rose

HYBRID TEAS OR EVERBLOOMING ROSES

BETTY UPRICHARD. Brilliant copper-red buds and semi-double salmon-pink flowers stained with copper-pink on the outside.

ETOILE DE HOLLANDE. Brilliant red flowers of magnificent size. Very fragrant.

ETOILE DE FRANCE. Vivid crimson, with darker shadings.

JONKHEER J. L. MOCK. A new pink rose from Holland, vigorous in growth and hardy.

KAISERIN AUGUSTE VICTORIA. Soft, pearly white color, shading to cream. Most popular white rose.

MME. BUTTERFLY. A harmony of bright pink, apricot and gold.

MME. EDOUARD HERRIOT. Long-pointed, deep, coral-red buds, changing to a pleasing orange pink color.

MRS. AARON WARD. Pointed buds of a rich yellow color, changing to a creamy yellow color after opening.

PRESIDENT HOOVER. Very fragrant with broad thick, heavy petals. The color is a combination of deep pink, flame, scarlet and yellow.

RADIANCE. Large, fragrant, long-stemmed, brilliant rose-pink flowers; most popular pink rose in America.

RED RADIANCE. Identical with Radiance, except flowers are of a deep red color.

REV. F. PAGE-ROBERTS. Golden yellow and cream in the inside of the flower, stained copper and dull red on the outside. Rapidly becoming one of the most popular Roses of America.

SOUV. DE CLAUDIUS PERNET. Color a decided and unstained sunflower yellow, even deeper toned at center. Will not fade. Flower form is large and full, the buds long and pointed. Vigorous grower.

TALISMAN. Brilliant orange-red buds, opening to a large fragrant high pointed bloom of glowing golden yellow, stained with copper red and orange-rose on inside of petals.

VILLE DE PARIS. Round buds of clear yellow. The bloom is much like Radiance.

HARDY CLIMBING ROSES

CLIMBING AMERICAN BEAUTY. Plant a vigorous grower. Color red, same as famous old American Beauty.

DR. W. VAN FLEET. Delicate shell pink.

FLOWER OF FAIRFIELD. Everblooming crimson.

GARDENIA. Bright yellow. Cream color when opened.

PAUL'S SCARLET CLIMBER. Vivid scarlet.

SILVER MOON. Favorite white climber; flowers semi-double, large, with brilliant yellow stamens.

PRICES. Strong 2-yr. field-grown plants, potted in 6 in. pots. Each, \$.75; Per 10, \$6.00

SUCCESSFUL PLANTING, PRUNING AND CARE OF STOCK

The bundles should be opened immediately, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them.

When ready to plant, take up only a few at a time, puddle the roots and do not allow them to lie exposed to the sun or air.

The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted two or three inches deeper than they stood in the nursery row; **pack the soil very firmly about the roots by tamping with the feet or post tamper**, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry apply one to two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

PRUNING

Many failures of newly transplanted stock are due to the lack of proper pruning. When the trees are dug in the nursery, some of the feeding roots are left in the ground, therefore, when transplanting it is necessary to restore the balance between the roots and the top by removing part of the tops.

In pruning, make a clean, sharp cut. Do not leave stub ends in removing branches. Pruning shears, knives and hand saws are the best tools to use. All tools should be sharp.

FRUIT TREES. One of the most important items in the care of fruit trees is to see that they are trained right from the start. Our two-year-old and larger sizes have the heads already formed, with three to five scaffold limbs well arranged along the trunk to support the head. These trees should be cut back, leaving just the scaffold

limbs shortened to the point where it is desired to have the head of the tree.

One-year trees, or whips, should be trimmed to smooth, straight stems, cutting them squarely off at the distance from the ground at which it is desired to have them branch. Usually, apples, plums, pears, and cherries are headed a little higher than peaches, which ought to be encouraged to branch as low as possible.

SHADE TREES. With shade trees having a heavy top at least one-third of the top should be removed. Prune to avoid crowding branches. Cut out some of the small branches, shorten back the side branches, but do not cut off the leader or main stem. Try to get well developed head, strong leader and branches at wide, not close, angles. Cut off all broken roots.

SHRUBS. It is easiest to prune shrubs before they are planted. This is likewise the only time the roots can be pruned. Cut off damaged or frayed roots just above the point affected. Thin out tops of many branched shrubs, removing the old wood. Cut tops back from one-third to one-half.

EVERGREENS. At planting time evergreens seldom need pruning. If well grown like ours they are shapely and when handled with balls of soil they should grow off without trouble. However in a year or so some varieties are inclined to grow "open." Then shearing may be done with hedge tools, clipping the young growth, preferably not further than that made the previous season. This causes the inner branches to advance making a very close and compact plant, thus hiding the unsightly interior of open trees. Topping, too, may be done but please try and cut to a small branch that will again develop into a leader. Chopping the tops off flat often makes good trees resemble a sawed-off board or log. **Important**—Prune evergreens when they are growing—better just as the spring growth comes on and at least before it becomes hard in July.

WINTER PROTECTION FOR EVERGREENS. Evergreens during the first Winter after planting should have some form of protection. Wind and sun may cause damage on account of excessive evaporation of moisture from the foliage at a time when no moisture is being taken in through the roots. When subject to alternate freezing and thawing protect also against heaving of the soil.

Moisture evaporation may be prevented by the erection of a burlap shield as a windbreak to ward off strong drying winds. Avoid wrapping too tightly or injury to the plant will result from heating of foliage.

To prevent heaving of the soil provide a ground mulch of strawy manure, cut tobacco stems or any material (other than fresh manure) which will form a light, loose covering.

Be sure, too, that the ground is thoroughly saturated with moisture before it finally freezes up, and leave no holes near the plants for the water to collect and freeze.

**We invite you to come to the nursery
and select your stock before it is dug.**

BloomAid

For Flowers, Shrubs, Vegetables

BloomAid is *easy to use*, indoors or out. A tablet or two, or a spoonful of liquid BloomAid in a glass of water—either is enough for a potted plant, now and then. For window boxes, porch boxes, and the flats where the seedlings grow, use granulated BloomAid from a shaker-top pound can or by the spoonful from a five-pound can. Outdoors, in the beds and among the shrubbery and around the hedge, use granulated BloomAid from bags. Full directions with every package.

ONE OF THE REASONS YOU CANNOT GROW SWEET CHERRIES

Of late years there have been many complaints from the older fruit growers that sweet cherries are not doing as well as they used to. They sicken and die without apparent cause. Much of this trouble is due to faulty understocks. The old cherry trees were mostly grafted or budded on Mazzard, which is the wild sweet cherry of our fence rows. But for a number of years most nurserymen have been budding their cherry on Mahaleb, a European variety, which is not as hardy or as long lived as the Mazzard, but easier to grow in the nursery. Therefore, planters should insist on having all sweet cherry budded on Mazzard stock and avoid disappointment.

WE GROW OUR OWN SEEDLINGS

We gather the ripe Mazzard cherries, sow the pits, and raise our own Mazzard seedlings, which are transplanted when they are one year old and budded to improved varieties. This gives a tree of known hardiness and vigor, both in root and trunk, and is much more sure to grow when transplanted.

SUITABLE DISTANCE FOR PLANTING

Apples—30 to 40 feet apart each way.

Standard Pears and Cherries—20 feet apart each way.

Plums, Peaches and Apricots—16 to 18 feet apart each way.

Dwarf Pears and Quinces—10 to 12 feet apart each way.

Grapes—rows of 10 to 16 feet apart; 7 to 10 feet in rows.

Currants and Gooseberries—4 feet apart.

Raspberries and Blackberries—3 to 4 by 5 to 7 feet.

Strawberries, for field culture—1 by 3 to 3½ feet.

Strawberries, for garden culture—1 to 2 feet apart.

Asparagus, for field culture—18 to 24 inches by 3½ to 4 feet.

Asparagus, for garden culture—18 to 24 inches apart each way.

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.
